Position	Area	Experience	Education
Project Manager	North	Four (4) years of experience in Project Management. Knowledge in equipment validation project plans. Knowledge of Operational Excellence Tools, Knowledge of Industrial Engineering Tools and Power Point Presentations.	Bachelor of Science in Engineering
Packaging Technology Specialist	North	Packaging rebranding initiatives, documentation, GMP, and regulatory procedures. Bill methods updates and Change Managements.	Bachelor Degree in Life Sciences or Engineering
Sr. Computer System Validation	East	Experience with validating Laboratory equipment such as IR and Titrators. Knowledge of OMNIC, TIAMO, Empower and LIMS a plus. SME for Generation and execution of CSV protocols	Bachelor Degree in Life Sciences or Computer Engineering
Engineer	East	Strong Knowledge on Vision system technologies. Inspection/packaging Concepts Knowledge. Strong Knowledge with local process flow, layouts and general packaging SOP's to be able to define details of serialization solution.	Bachelor of Science in Engineering and two (2) year of experience.
Sr. Associate Tech. Engineering	East	Five (5) years of experience in pharmaceutical operations or manufacturing processes. Installs, configures, troubleshoots, and maintains automated systems in Production, Facilities and Utilities Areas. These systems include (not limited to): PLCs, SCADA, microcontroller, single loop controllers, DCS and Fourth generation languages for interfaces and report development.	Bachelor of Science in Engineering preferable in Electrical or Mechanical
Sr. Validation Scientist	East / North	Search for innovative alternatives to achieve scope of works, cost, and quality. Effectively supervise assigned resources. Support the development of validation documentation including but not limited to Validation Plans, User Acceptance Test Designs, User Acceptance Test Scripts, User Acceptance Test Reports, Traceability Matrices, and Validation Reports.	Bachelor Degree in Life Sciences or Engineering
Maintenance Technician	East	Responsible for installation, inspection, maintenance, alteration, and repair of air conditioning, ventilation systems, process water/pollution control systems, building plumbing systems, and building management system, Sterilization process equipment troubleshooting and repair. EPA License. Experience in HVAC.	Associate's degree and +5 years of experience in regulated industry
Process Engineer	East	Responsible for designing and implementing manufacturing processes, equipment, and plants (from pilot to fully operational). May require a bachelors/master's degree and a number of years of experience (related to level) in the field or in a related area.	Bachelor of Science in Engineering

Position	Area	Experience	Education
Sr. Engineer	West	Independently provides and/or directs the characterization of process optimization strategies and/or troubleshooting of operational issues in the operations, manufacturing, pilot plant or capital projects environment.	Bachelor of Science in Engineering
Process Improvement	West	Improvement & Industrial Engineer oversees and manages operational standards, future operations capital needs, and development of annual budget operations standards. Works closely with the Integrated Process Team (IPT), Finance, and Supply Chain and Technical Operation/Support staff to develop and maintain profit plan commitments.	Bachelor of Science in Engineering
Validation Specialist	West	Five (5) years of experience in Equipment Validation Life-Cycle. Should be able to generate validation documentation like PQ protocols and reports. Should have experience in generating and reviewing SOP's r Point) Execution of CSV protocols	Bachelor Degree in Life Sciences or Engineering
Process Engineer	West	Analyze validation test data to determine whether systems or processes have met validation criteria or to identify root causes of production problems. Prepare validation or performance qualification protocols for new or modified manufacturing processes, systems, or equipment for production of pharmaceuticals, electronics, or other products. Coordinate the implementation or scheduling of validation testing with affected departments and personnel.	Bachelor of Science in Engineering
Quality Engineer	West	Creation, review and approval of validations protocols/reports, support during execution Knowledge in requirements and execution of engineering studies, Installation Qualifications, Operational Qualifications and Performance Qualification.	Bachelor of Science in Engineering
Cleaning Validation Specialist	West	Five (5+) years of Cleaning Validations experience. For Process Development. Experience in qualification, validation protocols or decommissioning. Cleaning and/or Sterilization knowledge.	Bachelor Degree in Life Sciences or Engineering
